

Reformatted Through-Hole Arrays

Abstract

Methods for loading a plurality of liquid samples into a through-hole array.

- 5 Each transfer member of an array of transfer members is positioned for drawing a liquid sample from a distinct well of a microtiter plate. Liquid samples are drawn from wells of the microtiter plate and the array of transfer members is registered with a subset of through-holes of a through-hole array. The liquid samples are then dispensed from the transfer members into through-holes of the
- 10 through-hole array.
